

Subject : Application for SDE Intern

Dear Hiring Manager,

I would like to express my deep interest in entering a position as a SDE Intern in your organization. I think I am perfect for the position as the components that were discussed during my studies closely match the skills required for this position.

Currently I hold a CGPA of 9.17 in my pre-final year at Indian Institute of Information Technology Una (IIITU), majoring in Computer Science Engineering. This has provided me with a solid foundation in computer engineering and problem solving which I test continuously through various competitive programming platforms.

As a fresher I have acquired skills in C++, ReactJS, HTML5, SQL, NodeJS, Javascript, MongoDB etc. and am fluent in data structures and algorithms along with other computer fundamentals. I have also built various projects such as a web calculator to calculate the monthly budgets of an individual and also a website to collect and store the memories of my college life.

I am sure if given a chance, I would prove to be a valuable asset for your already talented team. Please accept my CV attached and feel free to contact me for an interview at your convenience. I would be happy to provide any further information, if needed and am looking forward to hearing back from you. I appreciate your time and consideration.

Yours sincerely,

Saurabh Singh.
